Exact cut-outs on the scribe mark

With the new Vecturo OSC 18 cordless oscillator from Festool

Festool is expanding their range of cordless tools by adding the new Vecturo OSC 18 cordless oscillator for fitting and assembly work. The innovative StarlockMax tool holder guarantees that the tools can be changed quickly and conveniently, and without the need for additional equipment. In addition, the powerful, brushless EC-TEC motor and the large oscillation angle of 2°/2° achieve optimum working progress. Thanks to the clever design and the vibration isolation, the OSC 18 makes ergonomic work possible. In the same tried-and-trusted way, Festool has also developed their new Vecturo intelligent system accessories, which allow for dust-free work, precise cut-outs on the scribe mark and precisely guided plunge cuts.

Maximum flexibility in your everyday work thanks to StarlockMax

Festool has equipped their new cordless oscillator with the innovative StarlockMax tool-holder system. The intelligent quick-change system means that tools can be changed quickly and without the need for additional equipment. This means that you can change the required saw blade in just a few seconds. The patented Starlock tool-holder system covers three performance classes: Starlock, StarlockPlus and StarlockMax. The new Vecturo cordless oscillator comes with the StarlockMax tool holder. It

therefore falls under the performance class that is designed for the most heavy-duty of applications and maximum transmission of power in equal measure. Particularly practical for everyday use: This tool holder can accommodate accessories from all of the Starlock performance classes. This includes both Starlock and StarlockPlus. The new Vecturo therefore shows itself to be extremely flexible to use.

Maximum power

The new Vecturo is especially suitable for heavy-duty applications. Thanks to the anti-vibration system, the housing and motor are completely decoupled. This reduction in vibrations and running noises leads to optimum comfort while working. The powerful, brushless EC-TEC motor with variable speed control allows for a large oscillation angle of 2° to the left and 2° to the right, and therefore achieves optimum working progress. In combination with the powerful and durable 18 V Li-ion compact battery pack, the cordless oscillator achieves maximum freedom of movement without any cables – even for heavy-duty applications.

Intelligent system accessories

The versatile system accessories for the new cordless oscillator mean that this newcomer is the perfect all-rounder, and enable the user to work in a way that is healthy, comfortable and, at the same time, precise. With the new dust extraction device, it can also immediately start sawing without generating dust – with a clear view of the workpiece. The new positioning aid for precisely guided plunge cuts allows for precise positioning on the marking, and simple orientation on the guide rail. For this purpose, the positioning aid is equipped with a depth stop for precisely setting the plunge depth, and with the extractor connector for removing dust when sawing. The depth stop accessory guarantees, for example, precisely defined plunge depths when adjusting the door frame, and is used to protect the saw blade. These system accessories can be fitted easily on the adapter and without the need for additional equipment – depending on requirements.

The new Vecturo OSC 18 cordless oscillator will be available at specialist retailers from April 2019. Festool also offers full investment security for their

new Vecturo OSC 18 thanks to Festool Service. The free-of-charge service package guarantees direct, practical and comprehensive service for the tool throughout its entire service life. Visit www.festool.co.uk for further information about the OSC 18 (information online from 4th February 2019).

Total approx. 3,280 characters (not including spaces)

Technical data: Vecturo OSC 18 cordless oscillator

Battery voltage	18 V
Oscillation	10,000–19,500 rpm
Oscillation angle	2 x 2.0°
Tool holder	StarlockMax
Li-ion battery capacity	3.1 Ah
Weight with Li-ion battery	1.6 kg

	<p>Image: Festool-VECTURO-OSC18_01.jpg Precise cut-outs on the scribe mark, precisely guided plunge cuts on delicate surfaces and working with minimal dust generation, even above head height: This is what the cordless VECTURO OSC 18 is there for – an intelligent system solution to meet the highest demands when it comes to performance, comfort and precision.</p>
	<p>Image: Festool-VECTURO-OSC18_02.jpg The new Vecturo cordless oscillator from Festool comes with a StarlockMax tool holder and is therefore designed to deal with the most heavy-duty of applications and maximum transmission of power.</p>
 	<p>Image: Festool-VECTURO-OSC18_03.jpg StarlockMax tool holder with quick-change system for short set-up times when changing saw blades without the need for additional equipment.</p> <p>Image: Festool-VECTURO-OSC18_04.jpg Huge versatility: Saw blades for use with wood, as well as universal and custom applications.</p>
	<p>Image: Festool-VECTURO-OSC18_05.jpg Powerful in use: Powerful EC-TEC motor with variable speed control for optimum working progress.</p>
	<p>Image: Festool-VECTURO-OSC18_06.jpg Large oscillation angle of 2°/2° to the left and right – for fast working progress.</p>

Image: Festool-VECTURO-OSC18_07.jpg
 Anti-vibration system: Comfortable and ergonomic work thanks to the complete decoupling of the motor and housing.

Image: Festool-VECTURO-OSC18_08.jpg
 Dust extraction device: For sawing with minimal dust and a clear view of the workpiece. Ideal for overhead sawing work.

Image: Festool-VECTURO-OSC18_09.jpg
 Positioning aid: For precisely guided plunge cuts. With integrated depth stop and extractor connector.

Image: Festool-VECTURO-OSC18_10.jpg
 Positioning aid: Ideal for cutting out furniture.

Image: Festool-VECTURO-OSC18_11.jpg
 For precisely defined plunge depths – to protect the saw blade.

Image: Festool-Service.jpg
 Festool Service: The free-of-charge service package guarantees direct, practical and comprehensive service for the tool throughout its entire service life – for the new Vecturo OSC 18 too.
