## **Saw like a hot knife through butter**

**The new TS 60 K plunge-cut saw from Festool – from October 2022**

**The new TS 60 K plunge-cut saw cuts wood like a hot knife through butter and is safer and more versatile than ever before. Once again, Festool is setting new standards for plunge-cut saws. Thanks to the unique KickbackStop technology, the new saw minimises the risk of injury, protects the workpiece and makes work safer. Moreover, the greater cutting depth of 60 millimetres (e.g. for fire protection doors or solid wood) enables an unrivalled range of applications. Floor layers will also be pleased because the new TS 60 K can be connected to cross cutting guide rails. The latest generation of brushless EC-TEC motor makes the new plunge-cut saw robust, powerful and compact.**

Festool has been well-known for its circular saws for many decades. In the early 1960s, Festool brought the world's first portable circular saw with a guide rail onto the market. It then launched the first circular saw in the early 1980s. The German manufacturer was always raising the bar for saws with its new models. Once more, Festool will be way ahead with the launch of the new TS 60 K in October 2022.

### **Greater safety when sawing – thanks to the KickbackStop**

"Our best plunge-cut saw is now even safer because our unique KickbackStop not only protects the workpiece, it even minimises the risk of

injury," says Simon Illing, application engineer and master joiner. "Our new TS 60 K is highly precise, safer and delivers excellent results," he continues. In the event of a kickback, the KickbackStop is triggered by the saw blade jamming during sawing or plunge-cutting into the workpiece and stops the saw blade faster than the blink of an eye. A particularly practical feature is that once the KickbackStop has been triggered, the saw is ready for use straight away without replacements or additional costs.

### **Truly versatile**

With the TS 60 K, Festool has created its most versatile plunge-cut saw and its 60 mm cutting depth and compact design enable users to achieve outstanding results. It is even possible to saw mitre cuts of 45° in solid panels of up to 40 mm – and the guide rail can also be used. "The entire accessory system around the TS 60 K only really demonstrates its versatility in day-to-day use. What's particularly great is that the new plunge-cut saw can be combined with all cross cutting guide rails," Simon Illing adds. This makes it incredibly easy to make reproducible, precise and clean cross cuts following marks. Once again, Festool has considered many other details, such as easy saw blade changes, a splinter guard, an angle stop, a parallel side fence, precise depth adjustment with a double pointer and precision adjustment.

### **Robust and powerful**

The statement "it saws like a hot knife through butter" is an excellent description of the new TS 60 K's performance range. Its latest-generation brushless EC-TEC motor makes the saw virtually maintenance-free and powerful. The maximum speed of 6800 revolutions per minute ensures ideal machining, an effortless feed rate and, as a result, the best cutting quality. This means that the new plunge-cut saw is robust and, in combination with the comprehensive saw system, sophisticated down to the very last detail. It can both make precise cuts in solid wood and efficiently cut large panels on top of stacks to size with ease and reduces user fatigue.

### **Uncompromising performance**

The new TS 60 K, like all Festool tools, is of course completely covered by Festool SERVICE, giving you peace of mind for your day-to-day work. This includes repair orders, warranty claims, protection against theft and spare part availability.

The new TS 60 K plunge-cut saw will be available at specialist retailers from October 2022. More information will be available on [www.festool.co.uk](http://www.festool.co.uk) from 12th July 2022.

Total approx. 3850 characters (including spaces)

### Technical data for the TS 60 K

Power consumption	1500 W
No-load speed	3000–6800 rpm
Saw blade diameter	168 mm
Angle range	-1 to 47°
Cutting depth	0–62 mm
Cutting depth at 45°	45 mm
Dust extraction connection diameter	27/36 mm
Weight	4.6 kg

### Image preview

The new TS 60 K saws wood like a hot knife through butter – it's easy, smooth and extremely precise.

**Image: Festool-TS60K-02.jpg**

The new TS 60 K – with the unique KickbackStop

**Image: Festool-TS60K-02-KickbackStop.jpg**

Thanks to the unique KickbackStop, the saw blade stops in the blink of an eye, reducing the risk of injury caused by kickback during sawing or plunge-cutting into the workpiece.

	<p><b>Image: Festool-TS60K-03.jpg</b>          The new benchmark for plunge-cut saws:          The TS 60 K – available from October 2022.</p>
	<p><b>Image: Festool-TS60K-04.jpg</b>          The KickbackStop reduces the risk of injury caused by kickback during sawing or plunge-cutting into the workpiece. Once the KickbackStop has been triggered, the saw is ready for use straight away without replacements or additional costs.</p>
	<p><b>Image: Festool-TS60K-05.jpg</b>          The plunge-cut saw enables precise cuts at cutting depths of up to 60 mm in a compact design. Even for mitre cuts of 45°, materials of up to 40 mm can be sawn with the guide rail.</p>
	<p><b>Image: Festool-TS60K-06.jpg</b>          Maximum versatility: In addition to the tried-and-tested guide rails, the new TS 60 K can also be combined with all FSK cross cutting guide rails, for a portable system enabling quick and accurate cross cuts to be made.</p>
	<p><b>Image: Festool-TS60K-07.jpg</b>          Its brushless EC-TEC motor makes the new TS 60 K virtually maintenance-free and powerful.</p>
	<p><b>Image: Festool-TS60K-08.jpg</b>          Exact cuts, even at an angle</p>

**Image: Festool-TS60K-09.jpg**  
 Easier saw blade changing: The sophisticated design means the saw can be set down on its side, which simplifies changing of the saw blade. Thanks to the form-fit connection, the saw blade does not get caught in the clamping flange.

**Image: Festool-TS60K-10.jpg**  
 Plunge-cut saws in a system with a cross cutting guide rail, corresponding mobile dust extractor and the SYS-PowerStation.

**Image: Festool-TS60K-11.jpg**  
 Exact depth setting: The double pointer and precise adjustment ensure exact settings. This makes parallax-free reading standard.

**Image: Festool-TS60K-12.jpg**  
 Combining the saw with the cross cutting guide rail means that it can be used even more flexibly for floor laying work.
