Toys from Festool

New: Brand-new items from the Festool fan shop – available from September 2024

From September, young Festool fans will be able to play with their very own toy tools. Our usual approach applies here too: Quality meets style and emotions. Festool is now offering two toys as faithful reproductions for children aged three and over – the TY-TSC cordless plunge-cut saw and the TY-TPC cordless drill.

After years of enquiries, Festool is now offering two children's toys as faithful reproductions of the proven TSC 55 cordless plunge-cut saw and the TPC cordless drill. From September 2024, children aged three and over will now also be able to discover the world of Festool. Festool has taken great care to ensure that the design of the children's plunge-cut saw allows for important functions like plunging into the workpiece, illumination, saw blade changes and an adjustable cutting depth stop. The children's cordless drill offers child-friendly drilling and screwdriving with clockwise and anticlockwise rotation and lets children change out bits and drills via a CENTROTEC interface. And of course a realistic sound provides an authentic and lively playtime experience. But Festool has not only considered its young fans. The sound comes with a stepless volume adjustment and can also be switched off to make sure that it does not get on relatives' nerves. The removable battery is easy to recharge with a USB-C cable. The toys will make great Christmas presents, but keep in mind – only available while stocks last.

What else is new in the fan shop?

Another new item will be available in the fan shop from September: The thermal cup from Emsa in the Festool design. It keeps drinks hot for up to six hours or cold for up to twelve hours. The thermal cup is completely leak-tight and comes with a comfort screw cap and a 360° drinking opening with Quick-Press. It is made from stainless steel and features a high-quality engraved logo, making it suitable for dishwashers. But even aside from these items, it is always worth checking out the online fan shop to discover new and handy products, for example flip-flops, hoodies, hats, high-quality spirit levels, thermal flasks, camping cutlery, babygrows, footballs, backpacks, multitools, pizza cutters, flannel shirts and much more. For more information contact your specialist retailer or visit www.festool.co.uk and go to Fan merchandise to find clothing for men and women, merchandise for leisure time and sports as well as the office and workshop.
