The stage is set for maximum precision

The new OF 1010 R router from Festool

The new OF 1010 R continues the success of Festool routers. The OF 1010 R is the latest generation of routers from Festool, boasting logical improvements and practical new features. The stage is set for maximum precision!

Robust and yet precise – column clamping on both sides makes the OF 1010 R router torsionally rigid and therefore incredibly precise in application. Thanks to the adjustable zero point, the routing depth can be precisely set to within 1/10 mm at any point. The new parallel side fence made from die-cast aluminium is robust and, thanks to the integrated fine adjustment, can be easily adjusted all without any additional tools. The guidance jaws provide a seamless stop area that is easy to adjust to the router without the need for tools. This ensures perfect routing results and time-consuming reworking is a thing of the past. Its ergonomic handle makes the OF 1010 R rest particularly snugly in your hand and makes guiding the machine safe and convenient.

Perfect results thanks to light ring

One strength of the OF 1010 R is the clearly visible work area. The clear view of the router and the new LED light in the work area ensures absolutely precise results. The new LED light ring is fitted directly into the base plate of the OF 1010 R and therefore illuminates the routing area without

any shadows. The LED can be variably adjusted in two brightness level and offers up to six hours of light. The battery unit is removable and can be easily recharged via the USB-C interface.

Virtually unlimited applications

Typically Festool: Thanks to the wide variety of clever system accessories, such as routers, routing templates, guide rails and the jointing system VS 600, the possible applications of the OF 1010 R are virtually unlimited. The OF 1010 accessories Systainer offers excellent basic equipment when it comes to accessories (comes with the items included with the Set versions or available separately). The accessories Systainer contains many practical aids, such as guide rail adapters, base runners, copying rings and much more.

One Systainer. Countless possibilities

The Set version of the OF1010R includes the accessories Systainer. Among others, this contains a guide rail adapter, copying rings, base runners and many practical aids for a variety of applications. Best of all: All the accessories are neatly stowed away and always ready to hand in the practical Systainer³. We also considered router storage in the design – in addition to many accessories, the Systainer³ also offers additional slots for routers.

The new OF 1010 R router is available from February 2024 at select specialist retailers.

Festool accessories help you get ahead

With more than 1700 products, the Festool accessories significantly expand the number of possible applications and also offer exactly what you need for your application. "Festool not only develops machines, but also accessories in a comprehensive system that helps our customers get ahead. After all, a power tool is only as good as the accessories it is being used with. We value precision and quality, efficiency and reliability. Our accessory solutions increase productivity and reduce rework. Our aim is to achieve the best possible work process. From saw blades and abrasives to accessories for our routers and solutions for dust-free work. And since accessories play such an important role not only for our system environment but especially for our

customers and their work, the spotlight is on accessory solutions that are always exactly matched to our system and the relevant application. 2024 will be the year of accessories at Festool. You can look forward to many exciting and clever solutions that make daily work even easier," promises Sascha Menges, CEO of Festool GmbH.

Total approx. 3836 characters (including spaces)

Technical data of the OF 1010 R

Power consumption	1010 W
No-load speed	9500–23,000 rpm
Collet dia.	6–8 mm
Routing depth adjustment range	55 mm
Fine height adjustment range	8 mm
Bench opening	50 mm
Dust extraction connection dia.	27/36 mm
Cable length	4 m
Product weight without accessories	3.2 kg
