## **Everything in a system – everything neatly stowed**

### **The new Sortainer<sup>3</sup> from Festool**

**Clever organisation and time savings at the workplace: The new Sortainer<sup>3</sup> offers lots of space and provides a perfect overview of accessories and small parts. To make transport simple, Sortainer<sup>3</sup> products can be seamlessly integrated into bott vario3 vehicle equipment.**

From a stationary workshop to the place of use – Systainer<sup>3</sup> products improve mobility during everyday work. The same is true of the new Sortainer<sup>3</sup>: All accessories, small parts, nails, dowels and screws or tools are clearly organised and therefore at your fingertips. Thanks to the practical front drawers, the content is also accessible at all times when Systainers are stacked. In combination with the Systainer<sup>3</sup> system, this results in a flexible storage system with many possible combinations for use in workshops and on the go. Speaking of on the go: To make transport simple, Sortainer<sup>3</sup> products can be seamlessly integrated into bott vario3 vehicle equipment. The individual drawers can be subdivided with partitions to meet your specific requirements. The separately available plastic containers in various sizes offer even more flexibility – so you always stay on top of things, even small parts. In addition, the new Sortainer<sup>3</sup> fits the entire Festool Systainer system, making it easy to connect and transport. The SYS-Roll transport trolley and

the SYS-RB roll board make the Sortainer<sup>3</sup> even more mobile – for fast transport at the workplace or on the construction site. The new Sortainer<sup>3</sup> will be available from specialist retailers from January 2024. Visit [www.festool.co.uk](http://www.festool.co.uk) for more information

### **Festool accessories help you get ahead**

With more than 1700 products, the Festool accessories significantly expand the number of possible applications and also offer exactly what you need for your application. "Festool not only develops machines, but also accessories in a comprehensive system that helps our customers get ahead. After all, a power tool is only as good as the accessories it is being used with. We value precision and quality, efficiency and reliability. Our accessory solutions increase productivity and reduce rework. Our aim is to achieve the best possible work process. From saw blades and abrasives to accessories for our routers and solutions for dust-free work. And since accessories play such an important role not only for our system environment but especially for our customers and their work, the spotlight is on accessory solutions that are always exactly matched to our system and the relevant application. 2024 will be the year of accessories at Festool. You can look forward to many exciting and clever solutions that make daily work even easier," promises Sascha Menges, CEO of Festool GmbH.
