The best of both worlds

The new Systainer³ Combi

What could be better than a Systainer? The answer is simple: The clever combination of the Systainer³ and the Sortainer³. The new Systainer³ Combi allows you to transport machines and accessories in a single Systainer. There is space at the top for transport-safe storage of power tools and hand tools, and the relevant accessories can be stowed away underneath. You can individually divide the drawer with dividers or separately available plastic containers – so that you always see small parts, such as nails, dowels and screws. Everything is to hand – for better organisation and time savings at the workplace.

From a stationary workshop to the place of use – Systainer³ makes daily work easier. The Systainer³ Combi combines the advantages of the Systainer³ and the Sortainer³. There is space for power tools and hand tools at the top of the Systainer and you can stow away the relevant accessories in the drawer underneath. The Systainer³ Combi allows you to transport machines and accessories in a simple, compact way, with everything in one place. For even greater mobility, the Systainer³ Combi can also be seamlessly integrated into bott vario3 vehicle equipment. The lower drawer can be divided entirely according to your requirements using partitions. The separately available plastic containers in various sizes offer even more flexibility – so you always

stay on top of things, even small parts. Thanks to the practical front drawers, you can always access your accessories – even if the Sortainer³ Combi is stacked in a tower. The SYS-Roll transport trolley and the SYS-RB roll board make the Combi Systainer even more mobile – for fast transport at the workplace or on the construction site.

The new Systainer³ Combi will be available from specialist retailers from January 2024.

Festool accessories help you get ahead

With more than 1700 products, the Festool accessories significantly expand the number of possible applications and also offer exactly what you need for your application. "Festool not only develops machines, but also accessories in a comprehensive system that helps our customers get ahead. After all, a power tool is only as good as the accessories it is being used with. We value precision and quality, efficiency and reliability. Our accessory solutions increase productivity and reduce rework. Our aim is to achieve the best possible work process. From saw blades and abrasives to accessories for our routers and solutions for dust-free work. And since accessories play such an important role not only for our system environment but especially for our customers and their work, the spotlight is on accessory solutions that are always exactly matched to our system and the relevant application. 2024 will be the year of accessories at Festool. You can look forward to many exciting and clever solutions that make daily work even easier," promises Sascha Menges, CEO of Festool GmbH.
