Festool, Wendlingen (Germany) – June 2024

Press release for the technical press

Brightens up your workplace

New from Festool: SYSLITE KAL C cordless working light and SYSLITE KBS C cordless construction light – from October 2024

Festool is expanding its range of lighting solutions with two new cordless products: The handy SYSLITE KAL C is a typical light that you'll always want at your side. It is very compact and illuminates areas brightly and evenly in a colour that replicates daylight. With its lamp head that can swivel to any position, it is particularly handy in narrow and difficult-to-access places. Its bigger sibling, the new SYSLITE KBS C cordless construction light, provides optimum illumination for floors, walls and ceilings and therefore enables perfect work results for medium surfaces. It can also be positioned in any number of ways and comes with a swivelling housing. With 5000 lumens, it shines in a colour that replicates daylight and can be dimmed to any degree desired.

The small light that packs a mighty punch

The new SYSLITE KAL C cordless working light impresses with its compact size and low weight: It is extremely handy, suitable for use everywhere and at any time but especially so for hard-to-reach workplaces. With up to 1200 lumens, it is a powerful lighting solution with a colour that replicates daylight. There are three brightness levels to ensure the best possible illumination. The working light can be positioned in any number of ways: Place or lay it in any

niche, swivel it at any angle or hang it on a hook – just as you need it for your work. It also boasts impressive endurance: It provides light for 90 minutes per Ah, which makes for over six hours with a 4.0 Ah battery pack at the brightest level.

Brightens up the construction site

Not enough light and no socket in sight – a situation that any tradesperson on a construction will be familiar with. With the new, compact SYSLITE KBS C cordless construction light, Festool is now offering a perfect solution: Optimum illumination anywhere, anytime, without the need for any annoying pulling of cables and tripping hazards. With an outstanding light output of up to 5000 lumens and extensive illumination, you can work as if it were daylight anywhere and at any time. Particularly practical: The new cordless construction light can be dimmed to any degree desired and offers flexible mounting options. It attaches magnetically to metal surfaces, can be secured to walls or beams with screws or positioned on the tripod. The swivelling lamp body allows for a virtually unlimited number of lighting positions, which enables optimum illumination of the work area. The new cordless construction light is extremely robust and suitable for use both indoors and outdoors in tough construction environments, as the housing is shock-proof, scratch-resistant, dust-proof and splash-proof (IP 54). The new SYSLITE KBS C provides light for 30 minutes per Ah, which makes for over two hours with a 4.0 Ah battery pack at the brightest level.

Of course, both new cordless products – the SYSLITE KAL C working light and the SYSLITE KBS C construction light – are compatible with all Festool battery packs (except for Ergo pack). Both new products will be available from specialist retailers from October 2024. See www.festool.co.uk for more information.

A small working light that packs a mighty punch: The new SYSLITE KAL C cordless working light from Festool.

Image: Festool-SYSLITE-KAL-C-02.jpg

Bright: At 1200 lumens, it offers uniform illumination of the work area and reduced shadowing.

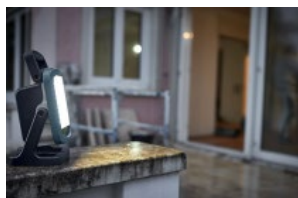

Image: Festool-SYSLITE-KAL-C-03.jpg

The SYSLITE KAL C is a light you'll always want at your side. It is handy, fits into the Systainer battery compartment or the toolbox, and is ready for use as soon as you need it thanks to the rechargeable battery.

| | |
|---|---|
|  | <p>Image: Festool-SYSLITE-KAL-C-04.jpg The SYSLITE KAL C cordless working light illuminates the work area brightly and evenly. You can easily set the LEDs to three brightness levels (300/600/1200 lumens) using the on/off switch.</p> |
|  | <p>Image: : Festool-SYSLITE-KAL-C-05.jpg Narrow or hard-to-reach work areas are where the cordless working light truly comes into its own. It can be positioned flexibly, and the lamp head can be swivelled into any position between 0–180°.</p> |
|  | <p>Image: Festool-SYSLITE-KAL-C-06.jpg You can simply hang the SYSLITE KAL C on a hook – for example, on a door – or secure it to a shelf or beam. The lamp also fits on tripods with a 1/4" thread, turning it into a cordless stationary light.</p> |
|  | <p>Image: Festool-SYSLITE-KAL-C-07.jpg With the MA KAL magnetic spherical head, which is available as an accessory, you can secure the cordless light to metallic surfaces or attach it to many other surfaces in combination with a fastening clamp.</p> |
|  | <p>Image: Festool-SYSLITE-KAL-C-08.jpg Compatible with all Festool battery packs (except Ergo pack).</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-01.jpg Brightens up the construction site: The new SYSLITE KBS C cordless construction light from Festool.</p> <p>Image: Festool-SYSLITE-KBS-C-02.jpg Optimum illumination – anywhere and at any time – with the new SYSLITE KBS C construction light from Festool.</p> |

| | |
|---|--|
|  | <p>Image: Festool-SYSLITE-KBS-C-03.jpg With a light output of up to 5000 lumens, you can illuminate your work area really brightly and extensively. If you don't want it to be so bright, the cordless construction light can be dimmed to any degree desired.</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-04.jpg The cordless construction light can be swivelled so that you can easily work with good lighting anywhere – whether on the floor, wall or ceiling.</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-05.jpg Variable in every position: There are many ways to attach the lamp for almost unlimited lighting positions, for example by having it magnetically adhere to metal surfaces.</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-06.jpg One of many lighting positions: The construction light can be attached to walls or beams with screws.</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-07.jpg Also ideal for convenient illumination with the tripod.</p> |
|  | <p>Image: Festool-SYSLITE-KBS-C-08.jpg Bright: At 5000 lumens for optimum illumination of medium-sized areas</p> |

**Image: Festool-SYSLITE-KBS-C-09.jpg**

The cordless construction light is suitable for use both indoors and outdoors in tough construction environments, as the housing is shock-proof, scratch-resistant, dust-proof and splash-proof.

**Image: Festool-SYSLITE-KBS-C-10.jpg**

Versatile: Lightweight and compact, with a carrying handle for when you're on the move.
