Mobile working – right down to the smallest detail

Available from spring 2024: New Systainer³ S models, varied accessories sets in Systainer³ S systems and the new Systainer³ Rack system

Festool continues to expand its Systainer³ workplace design range with new products: With the new Systainer³ S models, various accessories sets and the new Systainer Rack module. All of these new products will expand on the many different options for mobile working. They provide order and a clear layout for smaller Systainers.

Make way for the Systainer³ S – the smallest member of the family

In the Systainer³ S, your small parts and accessories are stored neatly and in a clearly organised manner. The MINI-Systainers are incredibly lightweight and have a handle, making them very easy to transport. The content in the Systainers can be easily and flexibly divided to suit your individual needs with partitions or a multi-purpose insert. This makes the MINI-Systainer³ S the perfect partner for neatly storing small parts. Festool has designed its new Systainer³ S models to be compatible with previous MINI-Systainer generations. With the introduction of the new Systainer³ S models, Festool is also offering a variety of new accessories sets:

- The **first-aid kid** with various products for rendering first aid,

- The **WAGO terminal set** with a voltage tester and various WAGO terminals,
- The **dowel set** with various DuoPower dowels,
- The **Forstner drill bit set** with high-quality Forstner drill bits and a centring bit,
- The **auger bit set** with auger bits in various diameters,
- The **oscillator saw blade set** with various saw blades for the VECTURO OSC 18 oscillator,
- A **bit and drill bit set** with SDS and spiral wood drill bits, Forstner drill bits and 100 mm bits.

Order and overview for small Systainers – with the Systainer Rack

The Systainer³ Rack is a mobile organisation system that can flexibly expand to fit individual requirements. This is a rack module in a Systainer format that can hold six MINI-Systainer³ S 76. It is based on a modular principle that allows individual modules to be combined to form a flexible storage system in the workplace. Thanks to a spring mechanism, the MINI-Systainers can easily be stored in a neat way in the Systainer³ Rack and removed with the press of a finger. Festool has also thought of the need to transport equipment to construction sites of course. The new Systainer³ Racks can be easily and securely transported with the bott vario3 vehicle equipment. The rack system simply grows with individual requirements since it can be assembled to match existing storage systems or combined in a variety of ways with other Systainers. A particularly handy feature is that the Systainer contents are always at hand and accessible at all times. The new Systainer Rack is compatible with the entire Festool Systainer system. It can be easily transported with the SYS-RB roll board or the SYS-Roll transport trolley, creating maximum order and overview in workshops, vehicles and construction sites.

The Systainer³ generation

Festool introduced its new Systainer³ generation almost five years ago. With the Systainer³, Festool cooperated with TANOS and bott to develop a new mobility system that links the workshop to the construction site. Thanks to the perfect integration into bott vario3 vehicle equipment, the new Systainer³ creates the familiar arrangement and the simple handling that you are used to, even when you're out on the road. Since then, Festool has gradually converted its entire range to the new Systainer³ and continues to expand the products on offer.

Perfect results require perfect accessories

"Festool not only develops machines, but also accessories in a comprehensive system that helps our customers get ahead. After all, a power tool is only as good as the accessories it is being used with. We value precision and quality, efficiency and reliability. Our accessory solutions increase productivity and reduce rework. Our aim is to achieve the best possible work process: From saw blades and abrasives to accessories for our routers and solutions for dust-free work. And since accessories play such an important role not only for our system environment but especially for our customers and their work, the spotlight is on accessory solutions that are always exactly matched to our system and the relevant application. 2024 will be the year of accessories at Festool. You can look forward to many exciting and clever solutions that make daily work even easier," promises Sascha Menges, CEO of Festool GmbH.

The new Systainer³ S, the accessory Systainer³ S and the new Systainer³ Rack will be available from spring 2024 in specialist trade and on our website www.festool.co.uk.

	<p>Image: Festool-Systainer3-S-01.jpg The new Systainer³ S: Simply practical – order in a system and 100% mobile.</p>
	<p>Image: Festool-Systainer3-S-02.jpg Flexible arrangement: All your small parts are quickly at hand and neatly stowed in the MINI-Systainer³ S. Partitions make it possible to divide the contents according to individual requirements – creating order and an overview of all small parts.</p>
	<p>Image: Festool-Systainer3-S-03.jpg A tidy storage system: MINI-Systainer³ S come in different heights and have a transparent lid to provide a quick overview. The small Systainers can be connected to each other and previous MINI-Systainer generations.</p>
	<p>Image: Festool-Systainer3-S-04.jpg Modular storage: With the Systainer³ Rack, six MINI-Systainer³ S 76 can be stored in a clearly organised manner. The Rack can be connected to other Systainers, transported in the bott vario3 vehicle equipment or set up to form a modular shelving system in a workshop.</p>

	<p>Image: Festool-Systainer3-S-05.jpg Variety with accessories sets: The equipped accessories sets in the MINI-Systainer³ offer a broad range of applications: There is something for everyone, from drill bit sets to dowels and WAGO terminals, through to first aid kits.</p>
	<p>Image: Festool-Systainer3-S-06.jpg First-aid kit in line with DIN 13157 for smaller workshops, construction sites and companies.</p>
	<p>Image: Festool-Systainer3-S-07.jpg WAGO terminal set for varied electrical installations on construction sites (voltage tester, cable stripper, WAGO COMPACT splicing connectors, in Systainer³ SYS3 S 76)</p>
	<p>Image: Festool-Systainer3-S-08.jpg Dowel set for various applications in all materials (DuoPower 5 x 25 and 6 x 30 mm and 6 x 50 mm and 8 x 40 mm and 10 x 50 mm dowels, DuoBlade 6 x 35 mm chipboard dowels, in Systainer³ SYS3 S 76)</p>
	<p>Image: Festool-Systainer3-S-09.jpg Forstner drill bit set for Festool cordless drills and cordless percussion drills with FastFix tool reception and WH-CE CENTROTEC tool chuck; for various drilling applications (Forstner drill bits FB D 15 CE, FB D 20 CE, FB D 25 CE, FB D 30 CE, FB D 35 CE, in Systainer³ SYS3 S 76)</p>
	<p>Image: Festool-Systainer3-S-10.jpg Auger bit set for TPC 18/4, TDC 18/4, C 18 and T 18 with FastFix tool reception (for use in the WH-CE CENTROTEC tool chuck). For deep blind holes and through holes in soft and hard wood (with D 6, D 8,</p>

	<p>D 10, D 12, D 14, D 16 auger bits, Systainer³ SYS3 S 76 with transparent lid)</p>
	<p>Image: Festool-Systainer3-S-11.jpg Oscillator saw blade set for OSC 18 – for wood, universal and special applications (SSP 52/OSC scraper, USB 50/35/Bi/OSC universal saw blade, 78/32/Bi/OSC universal saw blade, HSB 50/35/J/OSC wood saw blade, HSB 50/65/J/OSC wood saw blade, SSM 70/OSC silicone blade, MSB 40/32/HM/OSC carbide saw blade, in Systainer³ SYS3 S 76)</p>
	<p>Image: Festool-Systainer3-S-12.jpg Bit and drill bit set: FB D 35 CE Forstner drill bits, CE bits, CE drill bits: For Festool cordless drills and cordless percussion drills with FastFix tool reception and WH-CE CENTROTEC tool chuck; for drilling in concrete and wood and for fittings (SDS-Plus hammer drill: For BHC 18 and all other hammer drills with SDS-Plus tool reception).</p>
	<p>Image: Festool-Systainer3-RACK-01.jpg</p>
	<p>Image: Festool-Systainer3-RACK-02.jpg Compact storage: The Systainer³ Rack offers space for storing six MINI-Systainer³ S 76 in a clearly organised way. As a result, your small Systainers are also stowed in a neat and compact manner that makes them easy to transport in one.</p>
	<p>Image: Festool-Systainer3-RACK-03.jpg Simple removal: You can simply remove the MINI-Systainers with a press of your finger thanks to the spring mechanism. You can access your Systainers from the front at any time, even when the Racks are stacked.</p>

	<p>Image: Festool-Systainer3-RACK-04.jpg Organisation system with flexible expansion options: The Rack is designed like a shelf in a Systainer format. It can be connected to other Systainers, transported in the bott vario3 vehicle equipment or set up to form a modular shelving system in a workshop.</p>
	<p>Image: Festool-Systainer3-RACK-05.jpg Customised vehicle integration: For easy transport, the Rack can be integrated in the bott vario3 vehicle equipment.</p>
